

Hosting Services Roadmap

John Herbert
LYRASIS Director-Technology Services

LYRASIS **member SUMMIT**

The Plan In 1 Slide.

- Live our values.**
 - Open source
 - Community first
 - Great service
 - Fair prices
- Build the brand.**
 - Develop appropriate new services
 - Underscore LYRASIS as leader in the field
- Drive sustainability.**
 - Generate new revenues
 - Invest responsibly
 - Follow an innovation process
 - Connect all areas of LYRASIS
- Support the enterprise from end-to-end.**
 - Defragment the open source ecosystem
 - Integrate
 - Interoperate

What We Are Hearing.

*"For archival materials workflow, **interoperability and connections between systems is key**" especially as the institution moves forward analyzing new software products and acquiring services.*

-Assistant Head of Collection Services and Director of Special Collections, University of Tennessee at Chattanooga

*"I'm **done hosting locally**... only cloud."*

-Digital Initiatives and Systems Librarian, The University of the Arts

*"I **don't want to host the systems my staff uses**, only those that users see that I want to customize."*

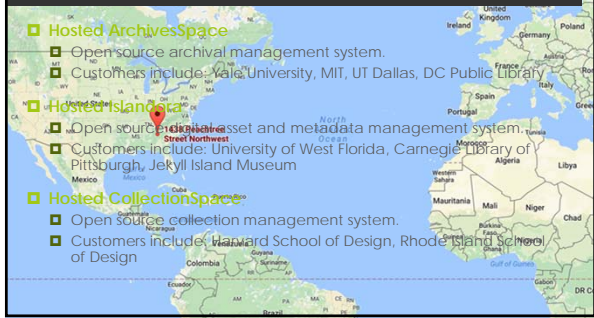

-Director of Library Technology and Digital Strategies, Emory University

The Big Question

What cloud-based services do you need/would you like to see developed?

- End-to-End Workflows
- Video Repositories
- Digital Preservation
- Data Aggregation
- Institutional Repositories
- Service Plan Pricing

Where We Are Now.

- **Hosted ArchivesSpace**
 - Open source archival management system.
 - Customers include: Yale University, MIT, UT Dallas, DC Public Library
- **Hosted Islandora**
 - Open source digital asset and metadata management system.
 - Customers include: University of West Florida, Carnegie Library of Pittsburgh, Jekyll Island Museum
- **Hosted CollectionSpace**
 - Open source collection management system.
 - Customers include: Harvard School of Design, Rhode Island School of Design

Where We Are Going.

- **Hosted ArchivesSpace**
 - New release + new features = public user interface
 - Integration with Islandora = pilot this fall
- **Hosted Islandora**
 - Next release = "CLAW" coming soon
 - Video solution pack = final this fall (and comparison to Avelon)
 - Streamlining collection creation = new themes
- **Hosted CollectionSpace**
 - Market research and analysis

What We Are Working On.

- New Customers
 - June, July
- Brand Identity
 - Define
 - Create
- "Service-ification"
 - launch

What's Next? Near Term.

The Future

- Avalon
 -
 -
- Hyku (aka, Hydra-In-A-Box)
 -
 -
- Digital Preservation
 -
 -

NEXT EXIT 

But Wait... There's More! Longer Term.

- Mukurtu
- IIIF
- Arclight
- Omeka
- SimplyE
- Metadata Capture
- Archivematica, DuraCloud, OJS...
- "Premier Technology Training Series"
- **INSERT your idea here!**

Why So Many Questions?

- How do we pick the *right* projects to work on?
- How do we broaden the scope/market of hosting services?
- How does hosting services go from good to great?
