

Fedora

Open Source Durable Object Repository

Robert Cartolano
Columbia University Libraries
October 18, 2016

What is Fedora?

- Modular, open source repository system for the management and dissemination of digital content.
- Worldwide installed base that includes academic and cultural heritage organizations, universities, research institutions, university libraries, national libraries and government agencies.
- Supported by two full-time staff members
- Managed by DuraSpace

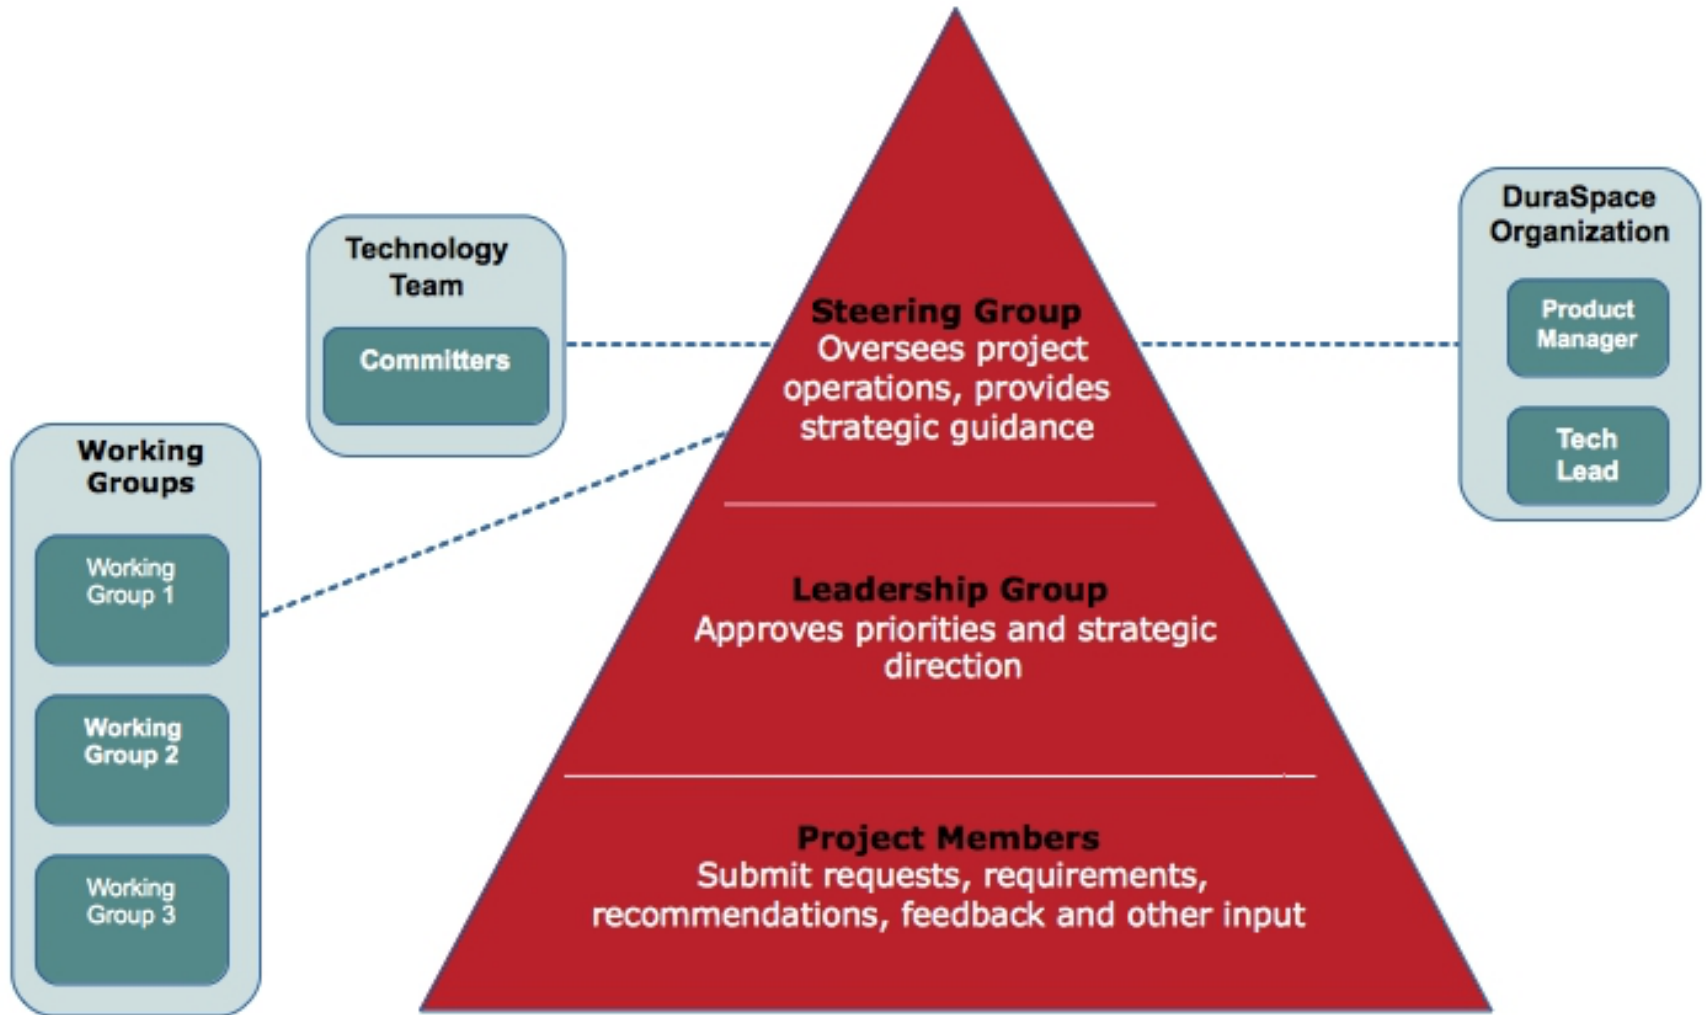

Fedora Members Over Time

Fedora Funding Over Time

Fedora Governance Model

Fedora Governance

- DuraSpace Board of Directors
