ArchivesSpace

CollectionSpace

DSpaceDirect

DuraCloud

Lyrasis Hosting Services provide expertise, infrastructure, tools and resources so you can take full advantage of your system without adding to your technical team.

- **Community Focused:** We actively contribute to the larger open source software communities.
- **Open Source:** All services use the most recent community-released, non-proprietary version of the software.
- **Easy:** Each service is installed on secure, high-availability AWS cloud-hosted servers with an online ticketing system for technical support.
- **Peace of Mind:** 24x7 monitoring of services and routine automatic back-ups.
- **Hassle-free** All maintenance and updates are included at no additional charge.
- **Affordable:** Only pay for what you use with low-cost, tier-based subscription plans. Discounts are available for Lyrasis members, ArchivesSpace and DSpace members and multiservice contracts.

## ArchivesSpace Hosting

ArchivesSpace is an open source **archives collection management system**.

- User documentation and recorded video training library
- Optional themed public interface
- Collection management functionality that includes Accessions, Finding Aids, location management, condition reports, space calculations and more
- Flexible and efficient technology for importing and exporting data
- API access and OAI-PMH configuration

## CollectionSpace Hosting

CollectionSpace is a web-based, open source **collections management system** for museums, cultural heritage organizations and more.

- Catalog anywhere, anytime using CollectionSpace's web-based platform
- Unlimited concurrent user accounts at no extra charge
- Public browser option for sharing selected collections
- Powerful CSV importing and exporting functionality
- REST API for harvesting data and integrating with other systems
- Exclusive NAGPRA support modules

## DSpaceDirect
